Bugs

1 **Agent generates from the wrong reference**

Slotomania, BINGO, WSOP, Talofa, Whalo. 8 reports, 3 channels. Notion 3614 still a candidate.

2 **Generations fail after a 10 to 15 minute wait**

Slotomania, three days running, 16 July. Limiting results to 6 did not help.

3 **Upscale and resize return the wrong resolution**

2x on a 1K image stays 1K. Direct resize gives 4K pixel dimensions with about 1K of detail.

4 **Generations disappear from the canvas on refresh**

They stay in the chat only. Notion 3453 was closed as Done, Playtika reported it again 9 July.

5 **PSD download fails after splitting into layers**

Slotomania, 22 July. Amit reproduced it internally.

Feature requests

6 **Model dropdown in chat and image remix**

Slotomania 15 July, WSOP 25 June. Remix is locked to Nano Banana 2 today.

7 **Send the prompt without the LLM rewriting it**

Slotomania, 15 July. Tetiana and Denis write the full prompt and want it untouched.

8 **Wheel zoom, space pan, copy between boards**

WSOP, BeboBee, Innplay. 4 reports, 29 June to 13 July. Measured against Miro.

9 **Copy a prompt from Image History, save presets**

Slotomania 22 July, WSOP 13 July. Presets for recurring materials, logos, styles.

10 **Aspect ratio and pixel size from a menu**

Slotomania 15 July, Wooga 22 June, Playtika Marketing 25 June. Typed today.

Decide this week: reference correctness or model and prompt control first. Playtika asked for both.
