

Sprint 53

Kickoff

11 Aug - 25 Aug 2026 / as of 11 August 2026

Genie

What we shipped last sprint

14 tasks completed. The highlights:

Roi

Model Catalog - Browse any model directly and generate from its native parameter panel, no agent.

Roi

Placeholder appears only during active agent generation - Placeholder now shows only while a job is running, and clears silently otherwise.

Ievgen

Disable auto camera-move on generation + completion toast - Canvas no longer auto-pans to new results; a toast with Jump there replaces it.

Maya

Agent doesn't see attached references / uses irrelevant reference - Fixed four root causes behind the agent missing or misreading attached references.

Ievgen

V2 app (UI) - share - Editor-level sharing with a single-editor lock.

Roi

Model config - full parameter schema for every model - Every model now carries a full parameter schema, synced from fal automatically.

Roi

Self-serve app builder for the product team - Product team can now build and publish a full app end to end without R&D.

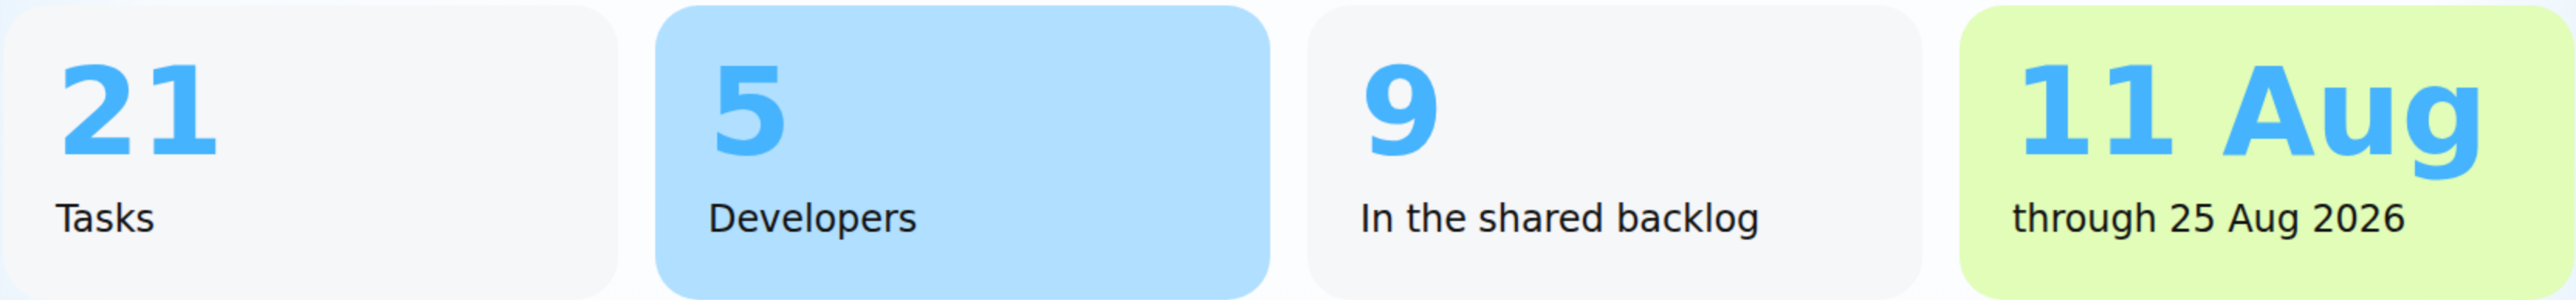

Maya

Must included images in tags - A tag can force a specific reference image into every matching generation.

SPRINT 53

21 tasks, 5 owners, 9 unassigned

Focus: New apps, role-based permissions, and agent-reliability research lead the sprint.

LOAD BY DEVELOPER

levgen Bogomolov	4 tasks
Dor Farjun	3 tasks
Roi Safran	3 tasks
Eyal Atzmon	1 task
Maya Abend	1 task

ASSIGNED

levgen Bogomolov

4 tasks in Sprint 53

Track failed agent image generations in Mixpanel

Fire agent_image_generation_failed per failed image, tagged with the failure reason.

● Medium

Upload video to canvas

Bring a video file onto canvas via toolbar or drag-and-drop, like a generated video.

● Medium

ASSIGNED

Dor Farjun

3 tasks in Sprint 53

Image to gif app

● Not set

New apps - Erase

Brush-mask an area to remove; the AI erases it and reconstructs the background.

● Not set

New apps - Paint over

Sketch a change over an image; the AI blends it in, matching style and lighting.

● Not set

ASSIGNED

Roi Safran

3 tasks in Sprint 53

FewGen: full GPT-image-2 size support via the agent

Map any natural-language size request to any valid GPT-image-2 dimension.

● Medium

Errors

● Not set

Multi chats per board

● Not set

ASSIGNED

Eyal Atzmon

1 task in Sprint 53

Agent failures - where and why we fail today - research

Categorize where and why the agent fails today and rank fix directions.

● Not set

ASSIGNED

Maya Abend

1 task in Sprint 53

User roles and permissions

Five cumulative roles (Viewer to Genie admin), set via API, enforced product-wide.

● Not set

BACKLOG - NEEDS AN OWNER

Unassigned in Sprint 53 (1/2)

9 tasks in the sprint with no assignee

Agent planning-phase speed - research

Map where planning-phase latency goes and rank ways to speed it up.

● High

Agent video references: honor each model's real reference limit (drop the flat 2-cap)

Replace the fixed 2-reference video cap with each model's real supported max.

● Medium

Video Magic Edit - research (prompt-based edit of generated videos)

Scan video-edit models for prompt-based editing and recommend if it's viable.

● Medium

3D models on canvas - import & view (research)

Research importing and viewing 3D model files on canvas; output a build direction.

● Not set

Chat references are draggable - user can reorder attached images

Let users drag-reorder attached chat images so image 1, image 2 references work.

● Not set

BACKLOG - NEEDS AN OWNER

Unassigned in Sprint 53 (2/2)

9 tasks in the sprint with no assignee

Frame download - include every image shown in the frame / layer view

Make frame download match the on-canvas frame 1:1 so no image silently drops.

● Not set

MAC: Placeholder Keeps Rendering Forever When Inner Step Fails

● Not set

MAC: Support Multiple Creation Groups Within the Same Job

● Not set

Onboard new editing models via Fal MCP (specify-only, like video)

Add a new editing model by specifying only its model ID, resolved via Fal MCP.

● Not set
