Bugs

1 **Agent uses the wrong reference image**

4 root causes found; 77 failed runs across 12+ orgs in 8 days. Fix in review, PR #543.

2 **Resize and upscale quality regression**

4K/2K outputs carry about 1K real detail. Jackpota and Playtika both confirm it, still backlog.

3 **PSD export fails after splitting into layers**

Slotomania, reproduced internally 22 July, re-raised 29 July. No fix since 16 July.

4 **Background removal fails across boards**

Talofa 24 July, Playtika 30 July confirm same pattern - platform-wide, not one board.

5 **Logo and legal disclaimer dropped in resize**

Playtika Marketing, 29 July. Confirmed blocker for campaigns already in production.

Feature requests

1 **Model picker in chat and image remix**

Slotomania, WSOP, Bingo all ask for it. Still typing the full model name today.

2 **Miro-grade canvas navigation**

WSOP, BeboBee, Innplay, Bingo. Wheel zoom, pan, copy between boards.

3 **Aspect ratio and pixel size from a menu**

Slotomania, Wooga, Playtika Marketing. JPEG export asked for twice in July.

4 **Prompt reuse - presets and one-click copy**

Slotomania, three separate asks since 2 July. Copy from history, resend on canvas.

5 **PSD export automation for dev handoff**

WSOP dev team. Auto layer naming, partial re-export, a send-to-dev button.

Decide this week: model and prompt control, or canvas navigation - both recurring, pick one this sprint.

Data insight

About 71,600 generations over 30 days. Peaked at 5,001 on 21 Jul, 4,643 on 28 Jul.

2 **Agent still about 75% of all generations**

14,167 of 18,925 generations. Fewgen image generation is the top single action at 5,965.

3 **Download rate holds flat around 16%**

Ranged 7.8% to 20.3% across the month, no clear trend either way.
