

Sprint 53

Kickoff

11 Aug - 25 Aug 2026 / as of 11 August 2026

Genie

What we shipped last sprint

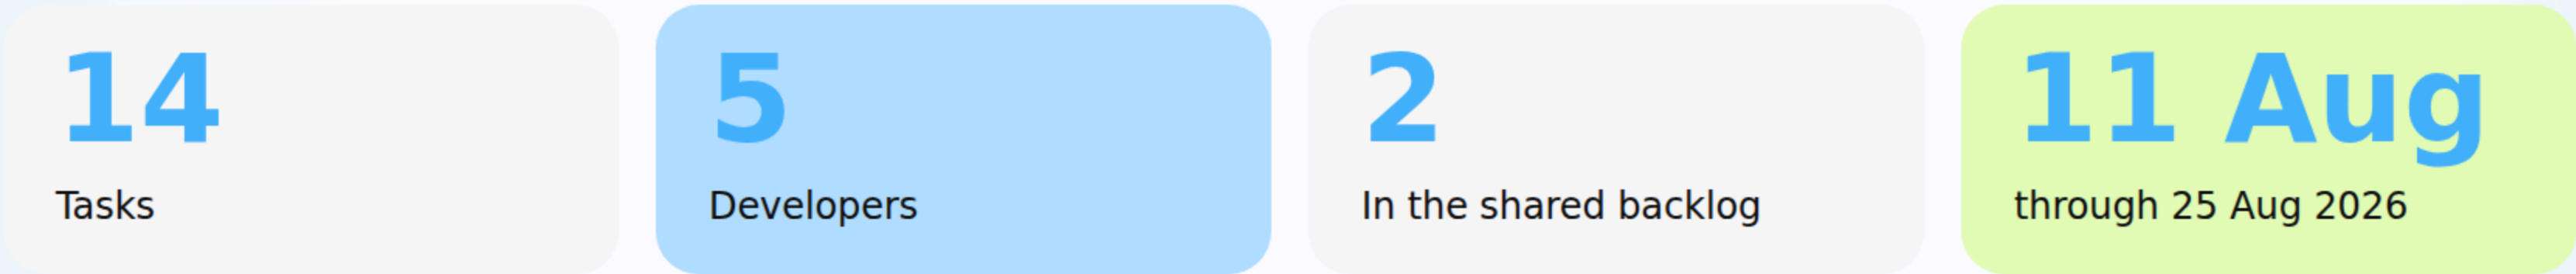

14 tasks completed. The highlights:

- | | |
|--------|---|
| Eyal | Plan-validator hardening - implement M1-M4 - Recoverable double-set slips no longer kill the job. |
| levgen | Disable auto camera-move on generation + completion toast - No more auto-pan; a toast jumps you there. |
| levgen | V2 app (UI) - share - Editor-level sharing in the V2 app, with a single-editor lock. |
| levgen | Images stuck in loading state on bulk paste to canvas - Fixed images hanging in a loading state on bulk paste. |
| Maya | Agent doesn't see attached references / uses irrelevant reference - Four root causes, now fixed. |
| Roi | Model Catalog - Browse any model and generate by hand, no agent involved. |
| Roi | Placeholder appears only during active agent generation - Ties to the real job - no more phantom loaders. |
| Roi | Self-serve app builder for the product team - Product team can build and publish an app end to end. |

SPRINT 53

14 tasks, 5 owners, 2 unassigned

Focus: New canvas apps (Erase, Paint over), video on canvas, user roles and permissions, agent reliability research.

LOAD BY DEVELOPER

levgen Bogomolov	4 tasks
Dor Farjun	3 tasks
Roi Safran	3 tasks
Eyal Atzmon	1 task
Maya Abend	1 task
Genie	3 / 9

ASSIGNED

levgen Bogomolov

4 tasks in Sprint 53

Track failed agent image generations in Mixpanel

Fire a dedicated Mixpanel event per failed agent image, tagged with the reason.

● High

Upload video to canvas

Bring a video file onto canvas via toolbar or drag-and-drop; plays like a generated video.

● Low

Asset catalog - avia

● Not set

skills - avia

● Not set

ASSIGNED

Dor Farjun

3 tasks in Sprint 53

Image to gif app

● Not set

New apps - Erase

Mark unwanted objects on canvas; AI removes them and rebuilds the background.

● Not set

New apps - Paint over

Sketch a change over an image; AI blends it in naturally.

● Not set

ASSIGNED

Roi Safran

3 tasks in Sprint 53

FewGen: full GPT-image-2 size support via the agent

Map any natural-language size or ratio request to a valid GPT-image-2 dimension.

● Medium

Errors

● Not set

Multi chats per board

● Not set

ASSIGNED

Eyal Atzmon

1 task in Sprint 53

Agent failures - where and why we fail today - research

Research where and why the agent fails today and recommend how to reduce it.

● Not set

ASSIGNED

Maya Abend

1 task in Sprint 53

User roles and permissions

Five roles (Genie admin to Viewer), set via API, enforced across the product.

● Not set

BACKLOG - NEEDS AN OWNER

Unassigned in Sprint 53

2 tasks in the sprint with no assignee

Agent planning-phase speed - research

Research where time goes in the agent's planning phase and recommend speedups.

● High

Agent video references: honor each model's real reference limit (drop the flat 2-cap)

Replace the fixed 2-reference cap with a per-model limit matching each real max.

● Medium
