

Sprint 55

Kickoff

8 Sep - 22 Sep 2026 / as of 8 September 2026

Genie

What we shipped last sprint

19 tasks completed. The highlights:

Eyal

Agent bug - chooses Image edit when Fewgen is needed - Fixed: agent now routes brand-asset edits to Fewgen, not random Image Edit.

Eyal

Agent bug - doesn't recognize model names - Agent resolves models from how users actually name them, no re-asking.

Ievgen

Generated results land in the user's current viewport (Agent / Apps / Models) - A result lands near the user's current view, not where it was requested.

Ievgen

Image upload flow - Apps + Model Catalog - Upload, drag-and-drop, or pick from canvas for any image-in model or app.

Ievgen

Model catalog: multi-type media input fields (image / video / audio) - One model field now accepts image, video and audio in any combination.

Ievgen

Upload video to canvas - Bring a video file onto the canvas via toolbar or drag-and-drop, like agent video.

Maya

User roles and permissions - Six roles, Admin to Viewer, set via API and enforced across the product.

Roi

Add skills to chat (skills part 2) - Chat gets a Try in Agent button and an Add menu for files, assets and skills.

SPRINT 55

7 tasks, 6 owners, 1 unassigned

Focus: BytePlus model routing, a new Paintover app, admin APIs for app permissions, and playable-ad research (video-to-playable, Agent SDK reskin).
