

Sprint 52

Kickoff

28 Jul – 11 Aug 2026 / as of 28 July 2026

Genie[®]

What we shipped last sprint

25 tasks completed. The highlights:

Maya **Per-org permissions for image and video models** - Control which image and video models each org can access.

Maya **Smart canvas arrangement** - Canvas predicts image size and clusters generations by job.

levgen **Image history in the V2 app** - Image history view in the new V2 app UI.

Roi **Video to GIF converter app** - New app that converts a video into a GIF.

Roi **Mask quick edit app** - New app for fast mask-based edits.

Roi **Download frame as PSD** - Export a canvas frame as a layered PSD file.

Eyal **Generic Model Operation** - Run any registered fal model through one generic operation.

Eyal **Agent latency - prompt caching** - Cache the agent clarity prompt, with cache-usage visibility, to cut latency.

SPRINT 52

15 tasks, 4 owners, 3 unassigned

Focus: Model Catalog and Fewgen model coverage, agent reliability and tracking, admin APIs.

In the shared backlog

28 Jul

through 11 Aug 2026

LOAD BY DEVELOPER

levgen Bogomolov	4 tasks
Roi Safran	3 tasks
Maya Abend	3 tasks
Eyal Atzmon	2 tasks

ASSIGNED

levgen Bogomolov

4 tasks in Sprint 52

Disable auto camera-move on generation + completion toast

Stop the canvas auto-panning to new results; add a completion toast with Jump there.

● High

Apps by product

Generate apps scoped to a specific game – its style, characters, and asset needs.

● Medium

Admin API – get all users of an org

Admin endpoint listing all users of an org, with an option to exclude Genie staff.

● Low

Track failed agent image generations in Mixpanel

Fire a per-image failure event in Mixpanel, tagged with the reason it failed.

● Low

ASSIGNED

Roi Safran

3 tasks in Sprint 52

Model Catalog

A model-first surface to browse any model and generate by hand, no agent involved.

● High

Fewgen – support all reference-capable image models

Let Fewgen run against any reference-capable image model, not just the fixed three.

● Medium

Model config – full parameter schema for every model

Store every model's full parameter schema from fal and validate requests against it.

● Medium

ASSIGNED

Maya Abend

3 tasks in Sprint 52

FewGen multi-reference: wrong images stitched into the mosaic

Fix the mosaic builder to stitch exactly the references the user attached.

● High

Key art

A key-art workflow producing a game's hero marketing image from its style.

● Medium

Skills

Review and tighten Genie's Skills end-to-end so behavior is predictable.

● Medium

ASSIGNED

Eyal Atzmon

2 tasks in Sprint 52

Agent planning-phase speed – research

Research where time goes in the agent's planning phase and rank speedups.

● High

Plan-validator hardening – implement M1-M4

Harden the plan validator so recoverable double-set slips don't kill the job.

● High

BACKLOG - NEEDS AN OWNER

Unassigned in Sprint 52

3 tasks in the sprint with no assignee

Add vectorize as an agent operation

Expose the existing algo vectorize as an agent operation callable from chat.

● Medium

FewGen: full GPT-image-2 size support via the agent

Map any natural-language size request to any valid GPT-image-2 dimension.

● Medium

GIF support on canvas

Animated GIFs render and play on the canvas like any other asset.

● Not set
